

DATA DESTRUCTION DAY

DISK DESTRUCTION

&

PAPER SHREDDING

SECURE YOUR (e)PHI WITH ACS

**Saturday, June 16th
11a – 2p
4750 Hoen Ave**

Come out to Data Destruction Day on Saturday, June 16th from 11am – 2 pm at ACS Technologies in Santa Rosa. Special thanks to our partners, Integrity Shred and Computer Recycling Center!

You're already familiar with HIPAA and why your patients' protected health information (PHI) must be kept private. However, with the HITECH Act, authorities are increasing their enforcement of HIPAA and imposing expensive case-by-case penalties for willful neglect. If you don't take the precautions necessary to destroy old PHI, whether its paper files or electronic ones, then you are just setting yourself up for heavy fines should disaster hit.

Protect yours and your patient's identity by having the personal information securely shredded at this free event in Santa Rosa.

Our community has offered other Shred-a-thons in the past, but ACS' is the only one that offers not only paper shredding but hard disk destruction, as well. Bring those old computers that you don't know what to do with and we will have our techs remove the hard drive, destroy it, and recycle the housing too!

Not only will this event allow you to purge your old files and your old computers but it's the only one that will provide you with a Certificate of Destruction for these as well. Proper destruction of confidential information requires the end-of-service procedure of providing a Certificate of Destruction to the client proving that the shredding of specific documents or destruction of hard disk took place at a certain date and time.
