- Technology Disaster Preparedness
- HIPAA for Business Associates

## About Amy

As CEO of ACS Technologies LLC and Copper Penny Consulting, LLC, Amy Wood consults with businesses to address their Risk Management and HIPAA Compliance programs, both before and after a Data Breach. She helps minimize the damage after a data breach and implements proactive compliance programs into existing workflows.

Amy has a long history in healthcare, both with patients and now behind the scenes in risk management and technology security. Amy has worked in healthcare for more than 20 years. Her passion for risk management began after her own identity was compromised as a result of X-rays being lost from staff errors. That passion has turned into a commitment to provide an easy to understand approach to complex regulations.

Amy has been named to the 40 Under 40's "One To Watch" by North Bay Business Journal twice, served multiple terms as a board member of the Dental Integrators Association, and maintains an active role with the FBI's Infragard Cybersecurity Group.

As a Continuing Education Provider, Amy educates private practice and clinics individually, as well as dental associations, study clubs, disability groups, and other assemblies.

Amy resides in Santa Rosa California with her husband, Scott. They have quite the household as they raise their three daughters and their company ACS Technologies, LLC, together.

Amy Wood  
President, ACS Technologies, LLC  
HIPAA Educator & Breach  
Mitigation Consultant  
HCISPP, CHSP, CHSA

## Testimonials

*I have taken HIPAA courses before but often felt lost and not knowing what to do next. This is a must take course that can save you trouble and fines in the future. Kudos to Amy for organizing this material and multiple layer of regulation into an easy to understand format.*

—Dr. Nicholas Rotas, Placer OMFS

*Her class is not like typical HIPAA training that often leaves people confused. The specific details and examples of real practices just like ours makes it relatable. Amy takes a practical approach to achieving compliance and helps us work an appropriate plan for our practice.*

—Dr. Victor Costanza, Santa Rosa
